Number 627 • August 2016

Enhanced validation of correct prescriber identification numbers

Effective August 15, 2016, Alberta Blue Cross is enhancing the validation of Alberta prescriber identification numbers. All direct-bill pharmacy claims from Alberta pharmacies must be submitted with the valid Alberta prescriber identification number and reference code of the prescriber who authorized the prescription.

The integrity of data submitted by pharmacies affects not only the adjudication of claims, but also assists in determining benefit status in instances where restricted benefits are limited by designated prescribers.

Use of the following prescriber IDs or prescriber ID reference code will result in claim rejections:

- Prescriber IDs starting with the alpha characters S, E, G or U — claims submitted with these prescriber IDs will result in a claim reject code **D3 – Prescriber is not authorized**. The College of Physician and Surgeons has ceased issuance of these types of prescriber IDs and they are no longer valid.
- Pseudo prescriber ID 99111PH (prescriber type - physicians) — claims submitted with this prescriber ID for narcotic or controlled drugs will result in a claim reject code **PA – Prescriber restriction for this drug**.
- Pseudo prescriber ID reference code 99 — claims submitted with this prescriber ID reference code for narcotic or controlled drugs will result in a claim reject code **PA – Prescriber restriction for this drug**.
